

"O Seven mobile shop" is the one of the famous mobile phone selling shop in Colombo. But they are new for online marketing and still they don't have good website. The shop owner outsourced the website development work to Sam who is a Freelance Web Developer.

He plans to use an incremental approach to develop the website.

The first phase of the website development involves implementing the basic structure of the website with HTML.

Guidelines for designing of the web pages are given below according to the requirements of O Seven.

Following web pages should be there on the website.

- **Home:** Contains details about promotions, discounted products, etc.

The home page should contain links to the following pages at the top.

- **About us:** Displays the history and testimonials about the company. (Can add videos as required.)
- **Smart phone:** Images and product details about smart phones.
- **Mobile Accessories:** Images and Details about Mobile Accessories.
- **Register:** Displays a form to login.
- **Contact us:** Shows the contact details of the shop including the address, and email.

Additional Information

- Details of the products must be given as images with price, discount percentages, etc. (There should be at least 5 products.)
- Use appropriate HTML elements according to the format and purpose of the content to be displayed on the web page.
